Wake-UP

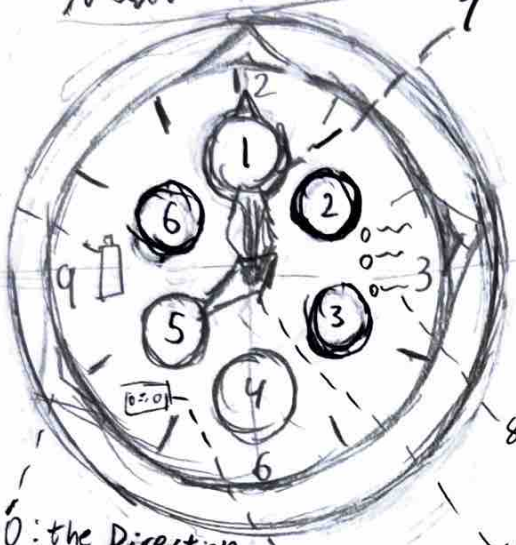

Battery Lvl & Band color are above hands

*sizes, proportions, scale, and all depictions may are not accurate to actual size or final product but is merely a concept of the work. for refrence.

1.73"; while the main menu is too large...

Main Menu

7 selector hand:

7. 

different color from other clock hands that like a commandeered second hand

1. starting point on launch compass
2. your band
3. the record
4. your BIO
5. settings
6. IDK

9: Battery Lvl indicator

* simply hands for readability

8: color code and distance maybe)

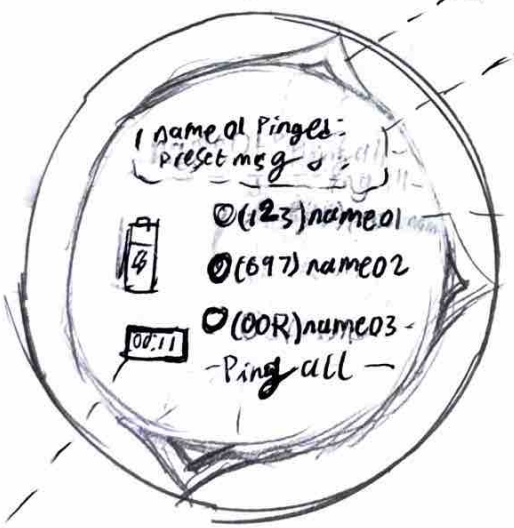

10: the Direction indicator color coded for each user

11: the clock hands wknow like a watch

12: maybe additional digital clock for those who can't read a regular clock

Help

Compass

1. Direction indicators
2. Ping pop up
3. O (###) name 1.52

shows a paired person is po the associated color with O and distance with (###)

name01 Pinged: preset msg

O (123) name01

O (697) name02

O (OOR) name03

Ping all

00:11

Apps.

Your Band: Pairing and currently paired?

icon: ?

function: Pairing, who is currently paired (and associated color),

the Record: ? Do we need a log (under question)

icon: Vinyl record

function: ~~your profile~~, a list of previous contacts

potential merge

Parts can be OFF LOADED TO APP since setup

Your Bio: who are you

icon: standard person icon with a record for a head

function: your profile and what is sent when pairing

settings: ? What? ? do we want this?

icon: gears gestures check

funct: edit profile, Battery health, time set, idk.
Pair with phone (if were doing App), ©

(is wake up)

Compass: locator, clock, color of Band members, Battery, ~~ranging~~ maybe ping?

icon:

function: You Already know (WHERE MY FREN)
is the wake up screen

: Mysterious option (IDK or SOS?)

icon:
